Please come join us for a great cause!

OUR GOAL IS TO RAISE OVER \$25,000 FOR RESEARCH THIS YEAR!

All of the proceeds will go to The Celiac Sprue Association.

Celiac Disease is an intolerance to gluten (a protein found in wheat, barley, oats and rye). It is a genetic disease in which the villi in the small intestines become damaged due to the ingestion of gluten. The only known "cure" is a strict gluten-free diet. Spreading awareness can save many lives. 1 in 133 Americans have Celiac, unfortunately 97% still remain undiagnosed. To learn more about Celiac Disease, visit www.glutenfreeforever.info.
